About me

Over 3 years of experience solving problems, learning new skills, and completing projects both collaboratively, through effective communication, and independently. I enjoy staying up-to-date with new technologies, and improving my skills by applying them in personal projects.

Skills

- **Spoken Languages:** Romanian, English
- **Frontend:** HTML, CSS, SCSS, JavaScript, TypeScript, AJAX, jQuery
- **Backend:** PHP, Node.js, Express, Next.js
- **Frameworks & Libraries:** React, Sass, Bootstrap, Tailwind CSS, Three.js, Framer Motion, Chakra UI, shadcn/ui
- **Databases:** MySQL, MariaDB, PostgreSQL, MongoDB
- **Build Tools & CI/CD:** Vite, Turbopack, Docker
- **Deployment / Platforms:** GitHub, GitLab, Vercel, Netlify, Supabase, Appwrite, Sentry, Clerk, Stripe
- **Tools & Utilities:** Git, Bash, Prettier, ESLint

Experience

Front End Developer - Keepcalling

Mar 2023 - Present

- Modernized jQuery code to vanilla JavaScript, improving maintainability and aligning with modern frontend standards.
- Developed and updated key web sections (homepage, checkout, user account) with dynamic behavior based on user-specific products.
- Implemented responsive, mobile-first UI, compatible across web and mobile apps.
- Handled bug fixes, redesigns, and optimizations for forms, emails, promotional sections, and complex components.

- Optimized backend processes by improving queries, updating API responses, and creating reusable classes.
- Collaborated with product and development teams to achieve a 3x increase in active users, contributing to product growth and performance improvements.

Education

Relational Database - freeCodeCamp

Completed Jul 2024

- Built practical databases for games, bike rentals, and data management applications.

PHP for Beginners Become a PHP Master - Udemy

Completed Oct 2023

- Learned procedural and object-oriented PHP, built a CMS project with database-driven functionality.

The Complete JavaScript Course From Zero to Expert - Udemy

Completed Aug 2023

- Learned modern JavaScript from fundamentals to advanced topics, built multiple real-world projects demonstrating practical programming skills.

Advanced CSS and Sass Flexbox, Grid, Animations and More - Udemy

Completed Jul 2023

- Applied Flexbox, Grid, animations, and best practices to develop responsive, maintainable designs.

Front End Developer - Pixellab

Jun 2022 - Feb 2023

- Completed front-end development training for 6 months.
- Gained practical experience by developing multiple projects and creating responsive web layouts.

DevOps Beginners to Advanced - Udemy

In progress

- Studying automation, cloud services, and infrastructure management workflows.

Projects

Converso

Technologies: Next.js, React, Tailwind CSS, TypeScript, Supabase, Clerk, Vapi, shadcn/ui, Vercel

Live Demo: <https://ai-saas-chat-app.vercel.app/>

- Built an AI-powered, voice-driven educational SaaS platform delivering real-time lessons.
- Implemented secure user authentication and subscription management.
- Developed interactive UI components and session tracking features.
- Demonstrates full-stack development skills, SaaS workflows, and scalable architecture.

StoreIt

Technologies: Next.js, React, Tailwind CSS, TypeScript, Appwrite, Recharts

Live Demo: <https://storage-app-nine.vercel.app/>

- Built a SaaS file storage application inspired by Google Drive and Dropbox.
- Implemented secure passwordless OTP authentication.
- Developed a dashboard for storage tracking and recent uploads.
- Added multi-file upload, rename, preview, download, and delete functionality.
- Enabled file sharing via link and global instant search.

TV Time

Technologies: React, Tailwind CSS, Vite, Appwrite, ESLint, TMDB API

Live Demo: <https://movie-app-omega-ten-10.vercel.app/>

- Built a modern web application for discovering and browsing movies with a responsive, user-friendly interface.
- Implemented search and filtering functionality based on title, genre, and release year.
- Integrated an external movie database API to display up-to-date film details, posters, and ratings.
- Implemented a database to store all user searches and generate a dynamic trending list, where the most searched movies appear first.

Other Projects

Old Personal Portfolio (Next.js, React, SASS) - <https://oancea-alin.netlify.app/>

Monochrome (Next.js, React, SASS) - <https://relaxed-pixie-565e99.netlify.app/>

Thread Affair (Next.js, React, SASS) - <https://eloquent-scone-6c5bb4.netlify.app/>

Rock Paper Scissors (Javascript, CSS, HTML) -

<https://elegant-twilight-cb4e55.netlify.app/>

Tic Tac Toe (Javascript, HTML, CSS) - <https://frolicking-souffle-e33725.netlify.app/>

Number Guessing (Javascript, HTML, CSS) -

<https://dazzling-sprinkles-efd334.netlify.app/>

Clock (Javascript, HTML, CSS) - <https://startling-rugelach-b2ddf9.netlify.app/>
